

Factsheet May 2026 Farringdon I - Farringdon European Opportunities

Investment Approach

Farringdon European Opportunities is a concentrated long-only fund investing in European small and mid-cap companies that are, for one reason or another, out of favour. We are indifferent to style, sector or narrative – we will look at any business, provided we understand it and the price is sufficiently attractive. In practice, this means spending most of our time where sentiment and expectations are at their lowest, as it is our firm belief that valuation is the most critical determinant of future returns.

Performance

Past performance does not predict future returns. Data is retrieved from the fund's administrator and/or Bloomberg.
